Education

2022 – Present

Bachelor of Science in Information Technology, University of Cebu – Main Campus

- Certifications: Cisco CCNAv7 – Introduction to Networks (Networking fundamentals, IP addressing, routing & switching)
- Introduction to Cybersecurity & Penetration Testing

2017 – 2018

Senior High School – STEM Strand, University of Cebu - Senior High School Building

- Specialization: Science, Technology, Engineering, and Mathematics.

Experience

OJT

- Worked on several websites using the astro framework.
- Assigned to QA work for finding bugs and making tickets using a ticket management system.
- Worked with a team to deploy service templates.

Academic & Project-Based Experience

- Worked on several school and personal projects focused on web development, databases, and IoT.
- Worked with small teams to plan, build, and test software and hardware projects.

Technical Projects

SmartResilience: An IoT- Based Child Safety Alert System | Developer

- Tech Stack: ESP32, GSM (AIR LUAT780E), GPS (ATGM336H), Firebase, Flutter, Python, C++, Arduino IDE
- Helped develop end-to-end project planning and execution, coordinating system design, development timelines, documentation, and team deliverables from concept to prototype testing.
- Developed and integrated wearable hardware components, including ESP32, GSM and GPS modules, panic button, vibration/LED feedback, and Li-ion power management.
- Designed and implemented an offline alert logging mechanism to ensure reliable emergency alert delivery during intermittent or poor connectivity.
- Worked on system integration and testing, aligning hardware behavior with mobile app workflows to support accurate GPS tracking, multi-guardian notifications, and geofencing.

VentureBud | Developer

- Developed an app for tracking steps and distance during hiking.
- Used ESP32-Camera to use the AI functionality to identify the terrain and describe it then display it on the app.
- Implemented an emergency alert system by using LoRa.

Skills

Languages: Python, Arduino, HTML/CSS, JavaScript, Typescript, Node, Java, C++.

Frameworks: Astro, Angular, Flutter, .NET.

Testing & QA: Functional Testing, Usability Testing, Test Case Execution, Defect Reporting.

Database: SSMS, SQLite, Firebase, Supabase.

UI/UX & Design Tool: Figma, Penpot.

Character Reference

Danrae Solano

Senior Delivery Consultant
